

Countroll® NIP Kit

Multipoint wireless Nip roller measuring gauge

Roller deformation and dimensional instability caused by inappropriate nip pressure and overheating are all too common and lead to poor performance and longevity of rollers.

With the technology provided by Countroll® NIP Kit, BFS has the perfect solution; enabling you to measure, maintain and monitor the optimum adjustment of nip pressure, including rollers that are cambered, to nearest millimetre via a Smartphone application.

Benefits

- Significant savings in downtime
- Increase in productivity
- Measurement precision
- Less waste from poor quality output
- Automatic suggested crown correction
- Flexible in terms of applications
- Longer lasting rollers
- Monitoring of measurement history

Four easy to use steps

- Use your 3 units to measure the nip width
- The Countroll® App recommends a crown correction
- Click to save the data onto Cloud based portal
- Record and consult nip history via the roller timeline

Included in the kit

- 3 NIP devices
- 5 measuring strips
- 10 QR labels
- Access to the Countroll® App

Delivery lead time - 2 weeks
